EDUCATION

Polytechnic University of the Philippines - BS Information Technology

2018 - 2022

President's Lister/ Dean's Lister

Oct 2019 - Oct 2022

Relevant Coursework: Software Engineering, Operating Systems, Database Management, AI

WORK EXPERIENCE

Narrasoft - Vue.js Developer | Pasig City (Remote)

Nov 2025 - Present

- Built reactive front-end features using Vue.js and TypeScript, modernizing legacy modules and developing new system components.
- Engineered backend logic and authentication via Supabase, implementing Row Level Security (RLS) for secure access control.
- Optimized PostgreSQL data storage and schema design to enhance application performance and query efficiency.

Narrasoft - PHP Developer | Pasig City (Remote)

Apr 2025 - Nov 2025

- Automated document workflows by integrating Google Vertex AI, OCR, and LLMs, achieving 85%+ accuracy and 70% less manual entry.
- Upgraded Google Document AI integrations, successfully boosting data extraction accuracy from 75% to 92%.
- Architected scalable systems using DDD and CQRS patterns to decouple read/write operations for better maintainability.
- Streamlined background processing by designing Laravel queue schedulers and cron jobs for asynchronous tasks.
- Reduced analytics latency from 12s to under 2s by optimizing complex MySQL/PostgreSQL database queries.
- Ensured code stability through comprehensive PHPUnit testing and full-stack quality assurance.

VtimeTech Consulting Inc - Mid PHP Developer | Makati

Jul 2023 - Apr 2025

- Integrated multiple third-party API services establishing seamless two-way communication with payment processors and wallet systems.
- Developed transfer and seamless wallet functionality with secure transaction processing and real-time balance updates.
- Managed backend development for both legacy system maintenance and new feature implementations using Laravel.
- Developed test suites using PHPUnit and Laravel Dusk for unit tests, integration tests, and end-to-end browser testing.
- Resolved critical production issues directly via live server access, maintaining system stability and uptime.
- Utilized Docker for containerized development environments ensuring consistent setups across the development team.

Blue Aurora Solutions Inc - Software Developer | Makati

Jun 2022 - Jul 2023

- Managed full-stack development using Laravel and Vue.js for e-commerce platform serving three countries (Philippines, Thailand, Vietnam).
- Created RESTful and GraphQL API endpoints consumed by web and mobile applications, enabling seamless frontend-backend integration.
- Implemented payment gateway integrations including ShopeePay and Lalamove across multiple countries with proper localization and currency handling.
- Maintained and enhanced existing payment methods (PayPal, GCash, GrabPay, VNPay, ZaloPay, eGHL) for mobile API endpoints, ensuring transaction reliability.
- Developed fully functional attendance system for company employees with time tracking, leave management, and reporting features.
- Created assembly tool web application to manage order processing in batches, streamlining fulfillment operations.
- Built Riders Portal web application to manage dispatched riders with real-time tracking and delivery assignment.

Blue Aurora Solutions Inc - Full-stack Developer Intern | Makati (Remote)

Mar 2022 - May 2022

- Performed full-stack development using Laravel and Vue.js, contributing to both frontend and backend features.
- Applied fixes and enhancements to existing and new REST API endpoints, ensuring code quality and functionality.
- Collaborated with senior developers in code reviews, debugging sessions, and agile development workflows.

iThinkWeb Corporation - Backend Developer | Pasig City (Remote)

Jul 2021 - Jun 2022

- Performed full-stack development using Laravel and Vue.js, contributing to both frontend and backend features.
- Applied fixes and enhancements to existing and new REST API endpoints, ensuring code quality and functionality.
- Collaborated with senior developers in code reviews, debugging sessions, and agile development workflows.

ReadyMaid Cleaning Services - Full-stack Web Developer | Makati (Remote)

Mar 2020 - Jul 2021

- Built and maintained complete booking management system independently using PHP and Laravel framework.
- Developed complex REST APIs consumed by frontend interfaces for service scheduling, customer management, and payment processing.
- Handled full system lifecycle including architecture design, development, deployment, and ongoing maintenance.

TECHNICAL SKILLS

Programming Languages - PHP, JavaScript, TypeScript, SQL, HTML, CSS, SASS

Frameworks & Libraries - Laravel, Symfony, CodeIgniter, Magento 2, Vue.js, Livewire, jQuery, Bootstrap, Tailwind CSS, GraphQL

Databases - MySQL, PostgreSQL, Supabase

AI & Modern Tech - Google Vertex AI, Google Document AI, OCR, Large Language Models (LLMs)

Developer Tools - Git, GitHub, Docker, Visual Studio Code, PHPUnit, Laravel Dusk

Architecture & Patterns - REST APIs, Domain-Driven Design (DDD), CQRS, MVC
